

Tropical Depression #9

OVERVIEW

Newly-formed Tropical Depression 9 is moving slowly west through the central Caribbean Sea. TD 9 is forecast to turn north through the western Caribbean Sea early next week and strengthen into a hurricane as it moves into the southeastern Gulf of Mexico.

TIMING & IMPACTS

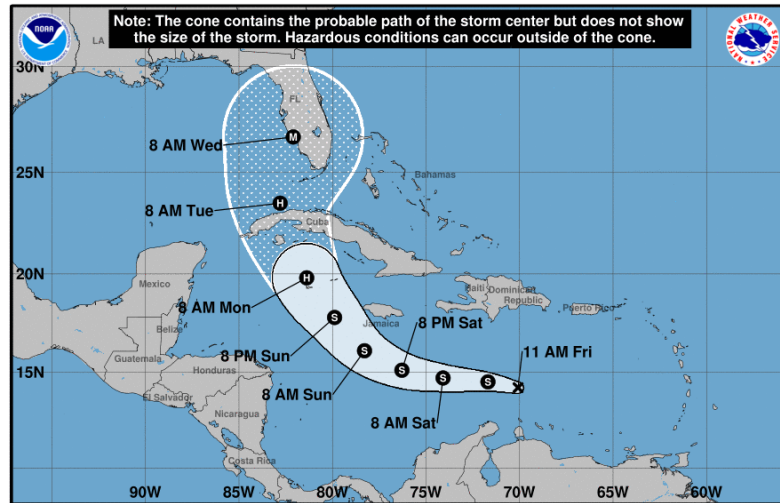

- Impacts to eastern North Carolina from TD 9 are possible late next week, but will be highly dependent on the eventual track

NWS ALERTS

- There are currently no headlines in effect across eastern NC related to TD 9.
- There are headlines in effect related to distant Hurricane Fiona:
 - Coastal Flood Warnings & Advisories in effect until 8pm
 - High Surf Advisory in effect through tonight
 - High rip current risk through the weekend

ADDITIONAL INFORMATION

- Additional one-pagers will be sent if the forecast, or conditions, warrant
